Jobs → Analytics

→ Round 1 - Tech → SQL, Tableau, Python

↓ (5-6 yr) (Leetcode)

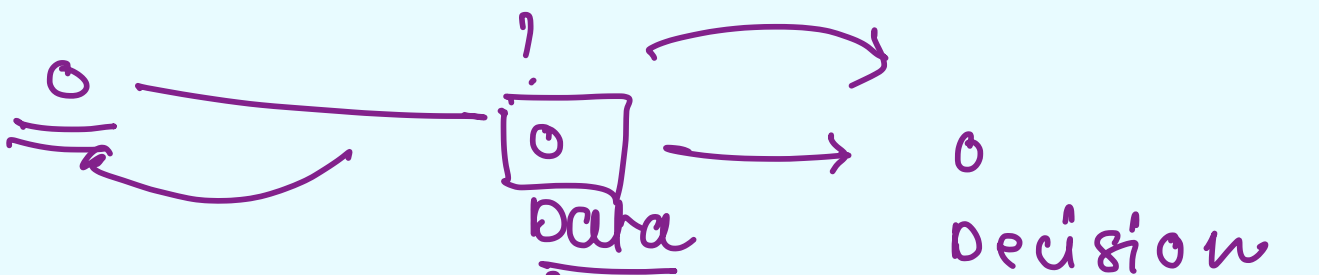
→ Round 2 → Manager (subjective

→ (Problem solving))

3 → HR

ee Product Analytics ??

Product | Business



DA ← [→ structure]

DS/ML ← [→ unstructured]

99%

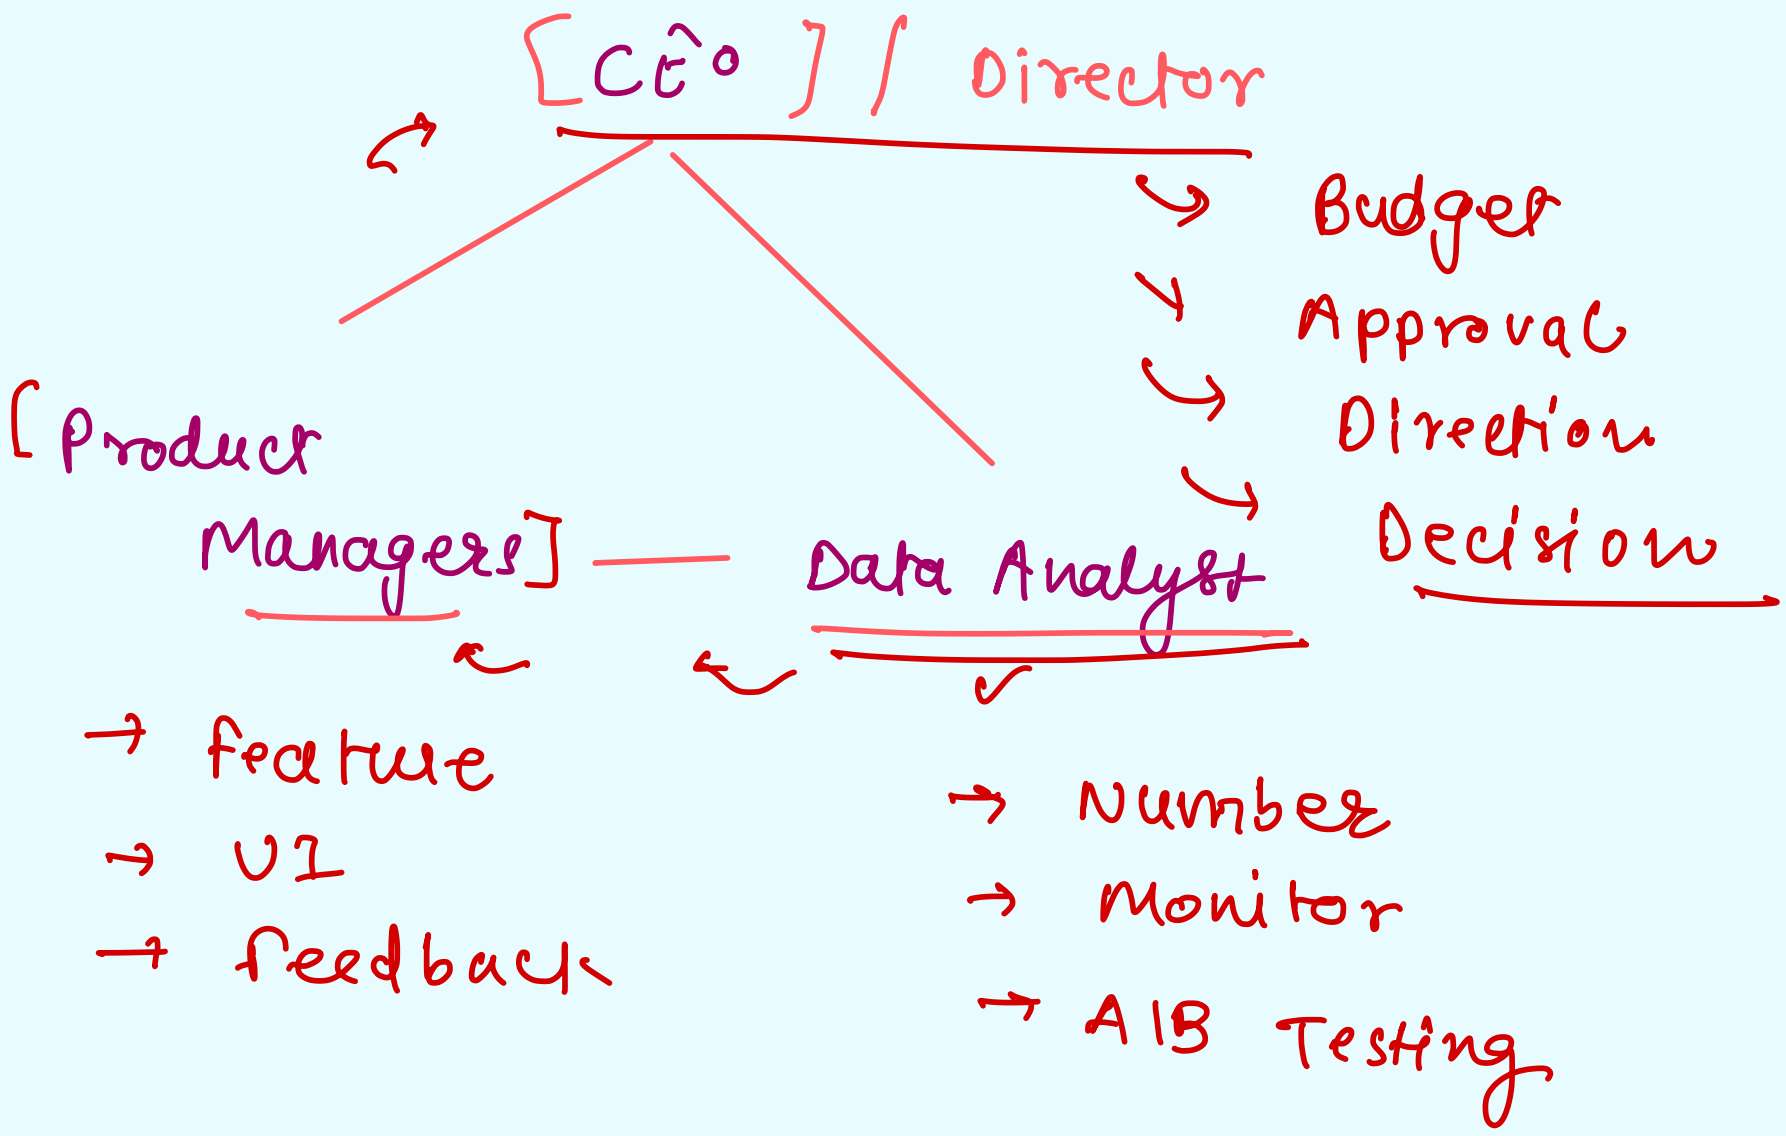
Product | Business sense

→ what questions :-

→ How do we Reduce Return Rate of Product?

→ How do we know that customer is using property to Party?

→ Sales of a particular store is going down by 5% YoY?



Made with Goodnotes

4000 stores → [4,000 SM] X

(Decision) 1. Director, SE (1000) → (DA)

2. → DA

3. → DA

4. → DA

→ Product accume

1. structure ✓ → (clarify + structure)
2. comprehensiveness → structure
3. feasibility →

→ you need to build a dashboard for the CXO's of uber → vehicle / country

→ what metric will you include?

Made with Goodnotes

→ structure (Rides, India)

→ framework

→ kotler

(sp - cp)

↑ (Profit)

→ Revenue

→ no of Rides

→ Avg Ride fare

→ No of customer

→ No of driver

→ No of app download

→ No of Rides / user

→ cust feedback

(Expenses)

→ Market Expense

→ Commision %

→ App Maintene

→ C.S Team

→ operational

→ Emp cost

→ server cost

Made with Goodnotes

- Ask clarify question
- → Have structure
- → feasible solution

→ structure

[→ Diagnosis (change in metric)]

→ Add feature

→ Product design

→ Product improvement
